DEPARTMENT OF HEALTH RESEARCH

Madibeng Child Nutrition Research Unit

RTHB Data Collection Audit Tool

Usage of the RTHB and its role in management of malnutrition in children under five, living in Madibeng sub-district, North West Province

Ref: SCENARIO-52-48-43bab57c926a-0006 Audit date: – Facility: Letlhabile

Synthetic Dataset Record – not an observed research participant

Study information

RESEARCHER

Tsholofelo Mohloane

STUDY DESCRIPTION

The study aims to assess the prevalence of malnutrition, determine the usage of RTHB and determine the relationship between RTHB and Malnutrition outcomes.

Audit metadata

Name of Facility **Letlhabile**	District **Bojanala**
Sub-District **Madibeng**	Date of Audit Tool **–**

Section A – Demographics

1 Age of the child

4 years 8 months

2 Gender

☐ Boy ☒ **Girl**

3 Type of household Structure

☐ Single parent household ☐ Two parent household ☒ **Extended family household**

4 How are you related to the child?

Mother

5 Caregivers Employment status

☐ Employed ☒ **Unemployed**

6 How many people in the household contribute to the household income?

0

7 Caregivers Highest Qualification

grade 11

8 Which area of Madibeng are you from?

Lethlabile

Section B – Aspects and knowledge on RTHB

9 Did you know that the RTHB is used to track your child's growth and development?

ÏYES ËNO

10 Do you know that you should bring your child's RTHB with you to every clinic visit?

ÏYES ËNO

11 During clinic visits, are you provided with explanations about the information recorded in your child's RTHB?

ÏYES ËNO

RTHB Assessment & Confirmation

Usage of the RTHB and its role in management of malnutrition in children under five, living in Madibeng sub-district, North West Province

Ref: SCENARIO-52-48-43bab57c926a-0006 Audit date: – Facility: Letlhabile

Aspects in the RTHB

Legend: FC = Fully Complete · PC = Partially Complete · NC = Not Complete · Selected cell marked

Aspect in the RTHB	NC	PC	FC
12. Child's first name and surname is documented on page ii	☐	☐	■
13. Clinic visit-recording sheet for children filled in pg. 2	☐	☐	■
14. Did the child attend all scheduled clinic visits according to their age-related schedule?	☐	☐	■
15. MUAC measured and recorded at all clinic visits and home visits in pg. 10	☐	■	☐
16. Was there action taken if MUAC was d 12.5, please see the action recorded.	☐	■	☐
17. Weight and Length/Height of the child is recorded in pg. 21?	■	☐	☐
18. Was weight-for-age charts plotted & connected correctly pg. 13 or 16?	☐	☐	■
19. Was the Length/Height for Age plotted and connected correctly pg. 15 or 19?	■	☐	☐
20. Was the Weight for Length/Height plotted and connected correctly pg. 11 or 20?	■	☐	☐
21. Action recorded when child is not growing well in pg. 21?	☐	☐	■
22. Is there evidence of counselling on infant or young child feeding practices in the past three months from pg. 31?	☐	☐	■
23. Were key social risks assessed & appropriate referral made pg. 41?	■	☐	☐

Nutritional status

24 Classification of the Nutritional Status of the child

ÐMAM ÐSAM **ÏNAM**

25 MUAC measurement

15.6 cm
