

RTHB Data Collection Audit Tool

Usage of the RTHB and its role in management of malnutrition in children under five, living in Madibeng sub-district, North West Province

Ref: AUD-2026-00144

Audit date: 15 Sept 2026

Facility: Oukasie

Study information

RESEARCHER

Refilwe Gafane

STUDY DESCRIPTION

The study aims to assess the prevalence of malnutrition, determine the usage of RTHB and determine the relationship between RTHB and Malnutrition outcomes.

Audit metadata

Name of Facility

Oukasie

District

Bojanala

Sub-District

Madibeng

Date of Audit Tool

15 Sept 2026**Section A – Demographics**

1 Age of the child

1 year 2 months

2 Gender

☐ Boy☒ Girl

3 Type of household Structure

☐ Single parent household☒ Two parent household☐ Extended family household

4 How are you related to the child?

Mother

5 Caregivers Employment status

☐ Employed☒ Unemployed

6 How many people in the household contribute to the household income?

1

7 Caregivers Highest Qualification

Grade 10

8 Which area of Madibeng are you from?

Oukasie**Section B – Aspects and knowledge on RTHB**

9 Did you know that the RTHB is used to track your child's growth and development?

☒ YES☐ NO

10 Do you know that you should bring your child's RTHB with you to every clinic visit?

☒ YES ☐ NO

11 During clinic visits, are you provided with explanations about the information recorded in your child's RTHB?

☐ YES ☒ NO

RTHB Assessment & Confirmation

Usage of the RTHB and its role in management of malnutrition in children under five, living in Madibeng sub-district, North West Province

Ref: AUD-2026-00144

Audit date: 15 Sept 2026

Facility: Oukasie

Aspects in the RTHB

Legend: FC = Fully Complete · PC = Partially Complete · NC = Not Complete · Selected cell marked

Aspect in the RTHB	NC	PC	FC
12. Child's first name and surname is documented on page ii	☐	☐	☒
13. Clinic visit-recording sheet for children filled in pg. 2	☐	☐	☒
14. Did the child attend all scheduled clinic visits according to their age-related schedule?	☐	☐	☒
15. MUAC measured and recorded at all clinic visits and home visits in pg. 10	☒	☐	☐
16. Was there action taken if MUAC was < 12.5, please see the action recorded.	☐	☐	☒
17. Weight and Length/Height of the child is recorded in pg. 21?	☒	☐	☐
18. Was weight-for-age charts plotted & connected correctly pg. 13 or 16?	☐	☐	☒
19. Was the Length/Height for Age plotted and connected correctly pg. 15 or 19?	☒	☐	☐
20. Was the Weight for Length/Height plotted and connected correctly pg. 11 or 20?	☒	☐	☐
21. Action recorded when child is not growing well in pg. 21?	☐	☐	☒
22. Is there evidence of counselling on infant or young child feeding practices in the past three months from pg. 31?	☒	☐	☐
